Executive Director

NOTE FOR: DDCI

John:

Here is a summary of the situation with respect to FOIA. It indicates consistent, if not dramatic, progress in getting the case load down, with another 200 or 300 case improvement as soon as the file designation process is completed--which I understand to be imminent.

NOTE FOR: Executive Director

SUBJECT: Status Report on FOIA

Jim:

Forwarded herewith is the blind memo you requested which responds to the DDCI's requirement for a status report on where we stand on FOIA.

STAT

Harry

Att:
As stated

In response to your request for a status report on the processing of Freedom of Information Act requests, the Office of Information Services offers the following information and observations. These figures include not just FOIA requests but Privacy Act and Executive Order Mandatory Review requests as well, since they are all processed as part of the same workload and by the same personnel. Furthermore, any changes in the number of one type of request necessarily affects the entire backlog.

How many people are working on FOIA, PA and EO requests?

STAT

There are [] people working primarily or totally on FOIA, PA, and EO requests. Of these [] are full-time staff, [] are part-time staff, and [] are part-time rehired annuitants. Many others throughout the Agency become involved as needed for search and review. Taking leave and other absences into account, total manyears for CY 1984 was []. Our overall manpower input thus far in 1985 is keeping pace with the 1984 figure.

STAT
STAT
STAT
STAT

What is the existing backlog?

Our current backlog as of 12 February 1985 is 2,757 cases. Of these, approximately 49% are FOIA requests, 41% are Privacy requests, and 10% are mandatory review requests.

How much has it been reduced?

We began 1984 with a caseload of 3,146 requests. By the end of 1984 we had reduced this to 2,955--a reduction of 191 cases. This reduction in backlog was accomplished in spite of a 14% increase in new cases in 1984 compared with 1983. Since the beginning of 1985 we have reduced the backlog by another 198 cases to its current level of 2,757 cases.

One thing that has contributed heavily to our recent success in reducing the backlog is the acquisition of additional word processors. Each case officer now has a word processor and can compose the numerous letters IPD sends to the public--over 200 a week--more efficiently. We have also hired three part-time annuitants to work on the larger "project

cases," and their impact is now being felt as their training progresses. A reorganization of our support functions, vital to the rapid and efficient handling of cases, has been accomplished and is paying handsome dividends on further reduction of the IPD backlog. Also contributing to backlog reduction has been the use of overtime to meet surge requirements and maintain smooth, steady workflow in all aspects of our case processing.

Has the processing time been reduced?

The processing time has not yet been reduced significantly. Since all the files that will be exempt from search have not yet been officially designated, our workload has not been affected by the new legislation. We expect that about 200 to 300 cases will drop from our workload as soon as these designations take effect, and processing time should reduce thereafter as current manpower is focused on the remaining cases. We are at present developing statistics on processing time during 1984 to use as a baseline against which to compare processing times at six-month intervals for the Congressional reports.

Are we living up to Congressional requirements/commitments?

The only formal commitment made to Congress in consideration of the new legislation was that we would not reduce our manpower input to FOIA for two years, during which time we would try to reduce the backlog to the point where response time is counted in months rather than years. We have made modest beginnings toward this objective even without file designations in effect. We have also developed a system of monitoring each component's manpower input, and we will alert any component that appears to be falling behind. The utilization of the Agency's FOIA resources needs to be monitored closely; prompt reallocations must be made as requirements and responsibilities shift if the overall FOIA backlog is to be reduced and processing time shortened, as Congress expects.

What is status of the designation of files under the CIA Information Act?

In anticipation of Congressional enactment of the CIA Information Act of 1984, the Director of Information Services established a task force to work on an implementing regulation and a DCI guidance memorandum to the Deputy Directors who would be affected by the new legislation. Members included OLL, OGC, and OIS. Because of the advance planning, a fully coordinated regulation and memorandum were delivered for the DCI's signature on the day the President signed the bill into law, 15 October 1984. Pursuant to the new legislation, the same task force worked with

the Office of Security, the Directorate of Operations, and the Directorate of Science and Technology in developing categories of files for recommending to the DCI as exempt from the search, review, and disclosure provisions of the Freedom of Information Act. This task force has nearly completed its work. The DCI has approved the OS designations and will be receiving the DS&T and DO recommendations within a few days. Representatives of the HPSI staff have been briefed on the DCI-approved OS designations. The Chairman of HPSCI subsequently wrote the DCI interposing no objection to their implementation. Likewise, the SSCI has interposed no objections. It is anticipated that there will be similar and perhaps more extensive briefings of the oversight committees on the DS&T and DO designations.

What is the status of the Historical Review Project?

In an exchange of letters, the DCI and Senator Durenberger agreed to a voluntary historical review program and the Senator arranged for staffing and money for this effort. In addition, Section 3 of the CIA Information Act of 1984 required a report on how the Agency could conduct a formal program for declassification review and release of information of historical value. The voluntary historical review program has begun. Topics to be considered for review have been identified and we are locating appropriate personnel to do this review. The program mandated by Congress is also being developed. In anticipation of the June 1985 deadline for the report, preliminary meetings have been held with the Archivist of the United States and he, plus a representative of the Library of Congress and three eminent historians that the Archivist selected, will be consulting with OIS and the Agency Historian in mid-March on the proposed program. Arrangements have been made for the DCI to meet with this group.

NOTE FOR: Executive Director

FROM: EA/DDCI

Jim,

By the time John gets back from his trip (19 February), he would like you to provide him a status report on where we stand on FOIA -- How many people are working the problem? What is the existing backlog? How much has it been reduced? Has processing time been reduced? Are we living up to Congressional requirements/commitments, et cetera?
